KAYAK

STRATEGIC ADVISORS

Brand Manual

Logo · Colour · Typography · Iconography

VERSION 1.0

OCTOBER 2026

Contents

This manual sets out how the Kayak Strategic Advisors identity looks and behaves. Use it whenever you create anything that carries our name: reports, proposals, presentations, our website and social channels, signage and stationery.

All logo artwork is supplied in the KSA Logo Package. Always use those master files. Never redraw, retype or recolour the logo.

01	The brand idea	03
02	Logo	04–09
03	Colour	10–12
04	Typography	13–14
05	Monogram and iconography	15–17
06	Contacts and files	18

Two paddlers. One course.

A kayak is a disciplined, agile craft. It moves through changing conditions by balance, direction and purposeful navigation. That is how we help clients move through complex business, regulatory, operational, technological and risk environments: with clarity, resilience and practical guidance.

Strategic Advisors names what we do: independent, structured and forward-looking advice, analysis and implementation support across corporate strategy, transactions, risk and investigations, brand and intellectual-property protection, technology and data, human resources, compliance, tax and finance.

Together, the name stands for a partnership that helps clients set direction, manage complexity and carry out sound, sustainable decisions, like two kayakers working as one through stormy water.

WHAT THE BRAND STANDS FOR

Balance

A steady core that keeps every engagement upright, whatever the conditions.

Clarity

Reading the water as it really is: facts, risks and what lies beneath the surface.

Direction

A clear heading, and the conviction to act on it together with the client.

The logo

A wordmark with a built-in identifier. Always reproduce it from the master artwork in the KSA Logo Package.

1 Wordmark

KAYAK in custom geometric capitals. The two A's are left open, like bows cutting through water, and the word reads the same in both directions: a quiet sign of balance.

2 Identifier

The Confluence Y. Two blades, Open Water and Beacon Saffron, converge into one Deep Current stem: two partners, one decision.

3 Descriptor

STRATEGIC ADVISORS in Archivo SemiBold, spaced to the full width of the wordmark. It is part of the artwork: never retype or reposition it.

The Confluence Y

The Y sits at the exact centre of KAYAK. It carries the whole story on its own, so it can stand in for the brand where the full logo will not fit.

Left blade · Open Water
Clarity: understanding the client's waters.

Right blade · Beacon Saffron
Direction: the heading we help set.

Stem · Deep Current
One course: a sound decision, carried through.

The gaps
Discipline: each partner holds a clear line until they meet.

WHERE IT STANDS ALONE

Logo versions

Use full colour wherever you can. The other versions exist for backgrounds and print methods where full colour will not hold.

Full colour

The default. White and light backgrounds.

Reversed

Deep Current, Undertow and dark photography.

One colour · Deep Current

Single-colour print, embossing, engraving and foil.

One colour · White

Open Water and other mid-tone colours, and busy images.

One colour · Black

Newspapers, forms and black-only printing.

Wordmark only

Below 45 mm or 240 px wide, where the descriptor would be too small to read.

Clear space and minimum size

X is the width of the K's upright (highlighted). Keep a margin of at least 2X clear on every side. No text, image, rule or page edge may enter it.

MINIMUM SIZE

Full logo — 45 mm print · 240 px screen

Wordmark only — 20 mm print · 100 px screen

Identifier — 6 mm print · 20 px screen

Below the full-logo minimum, switch to the wordmark. Below the wordmark minimum, use the identifier.

Backgrounds

Each brand background has one right version of the logo. Pick the version from the background, never the other way round.

ON PHOTOGRAPHS Place the logo over a calm, even part of the image: reversed on dark areas, full colour on light ones. If no calm area exists, set the logo on a solid Deep Current panel.

Misuse

The logo only works when it is left exactly as drawn. These are the most common ways it gets broken.

✕ Don't stretch or squash it

✕ Don't rotate or tilt it

✕ Don't change its colours

✕ Don't swap the blade colours

✕ Don't add shadows, glows or bevels

✕ Don't place full colour on mid-tone backgrounds

✕ Don't retype or restyle the descriptor

✕ Don't put it inside a badge or frame

Primary colours

Four colours tell the story of the water we navigate with our clients. Together they carry every piece of communication.

Deep Current

The depth of expertise below the surface. Our anchor.

HEX	**#0E2F3C**
RGB	**14 47 60**
CMYK	**77 22 0 76**
Use	Wordmark, headings, dark grounds

Open Water

Clarity and steady progress.

HEX	**#17807E**
RGB	**23 128 126**
CMYK	**82 0 2 50**
Use	Left blade, links, charts, panels

Beacon Saffron

Direction and decisive guidance.

HEX	**#EE9B1E**
RGB	**238 155 30**
CMYK	**0 35 87 7**
Use	Right blade, highlights. Accent only

Sea Mist

Room to think.

HEX	**#EEF4F1**
RGB	**238 244 241**
CMYK	**2 0 1 4**
Use	Page backgrounds and panels

CMYK values are calculated starting points. Before a print run, confirm each colour against a printed proof on the chosen paper stock.

Secondary and tertiary

Secondary colours mark the conditions we work in. Tertiary tints and shades are for charts, tables and backgrounds.

SECONDARY

Beautiful, and always readable

COLOUR BALANCE

White and Sea Mist	**60%**
Deep Current	**25%**
Open Water	**10%**
Beacon Saffron	**5%**

READABILITY RULES

Set body text in Deep Current or Storm Slate on White, Sea Mist, Spray or Haze.

On Deep Current, set text in White or Spray.

Saffron is a signal, never text on light grounds. On a Saffron panel, use Deep Current text.

Use Open Water for text only on White, or at 24 px / 18 pt and above.

In charts, never rely on colour alone: add labels or patterns.

Expanded Bold

The same family that sets STRATEGIC ADVISORS in the logo. Its width axis gives us confident, expanded headlines and compact, efficient text from one typeface. Use it for headlines, labels, tables, charts, slides and everything on screen.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789 ₹ $ € % & @ ( ) →

Source Serif 4

SECONDARY

Aa

Regular
Italic
SemiBold
Bold

A calm, highly readable serif for long reading. Use it for the body of reports, proposals and letters, and for quotations, where it lends the authority and warmth of good editorial writing.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789 ₹ $ € % & @ ( )

Free to use. Both families are licensed under the SIL Open Font License, for print, web and apps.

Where to find them. Folder 05_Fonts of the KSA Logo Package, or Google Fonts.

Fallbacks. Where fonts can't be installed, such as email, use Arial for Archivo and Georgia for Source Serif 4.

Type hierarchy

Print sizes in points, screen sizes in pixels. Left-align all text; never justify.

STYLE	SAMPLE	SPECIFICATION

Caption	Source: company filings and public records, October 2026.	Archivo Regular, Storm Slate · 8.5 pt / 12 · screen 13 px

The KSA monogram

K and S are drawn in Deep Current, from the same geometry as the wordmark. The A rises as two blades, Open Water and Beacon Saffron, that meet at one peak. The Y in the logo shows two partners converging on a decision; the A shows them rising together to the summit.

WHEN TO USE IT

Where our name is already known or space is tight: social avatars, seals and stamps, document headers, slide footers, signage details and merchandise. It never replaces the full logo on a first impression: covers, the website header and the front of business cards.

Full colour

Reversed

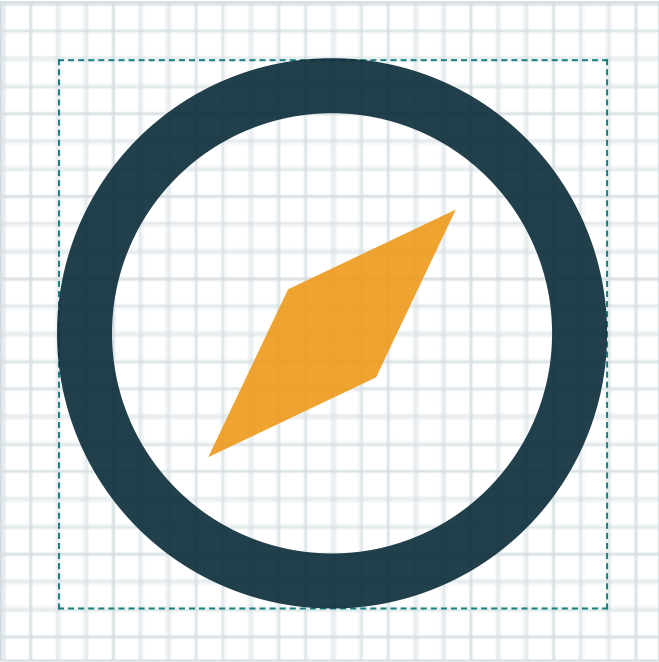

One colour

Tile

Minimum size 12 mm or 48 px wide. Clear space: the width of the K's upright on every side. The misuse rules on page 09 apply in full.

Iconography

24 × 24 grid. The dashed line marks the 2 px safe margin.

Grid

Drawn on a 24 × 24 px grid with a 2 px safe margin, so every icon carries the same visual weight.

Stroke

2 px strokes with flat-cut ends and sharp corners, echoing the cut geometry of the logo.

One accent

Duotone icons mark the point of the idea in Beacon Saffron: the finding, the signal, the decision. Never more than one accent.

Plain geometry

Circles, squares and straight lines. No gradients, shadows, 3D or decorative detail.

THREE STYLES

Line

Interfaces, tables, small sizes. Deep Current, White or Black.

Duotone

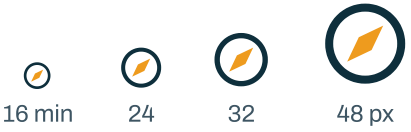

Reports, slides and the website. Our default.

Badge

Service cards, feature lists and social posts.

SIZES

Scale icons whole, in steps of 8 px. Never mix them with other icon libraries.

Icon library

48 icons, each supplied in six versions as SVG and transparent PNG. File names follow ksa-icon-name.
